## NO END TO BEAR RAID IN STOCKS

Unsettled Condition of Commerce Results in Confusion.

## SUSPEND DIVIDENDS

Losses Sustained in Face of Easiest Money Conditions in Many Weeks.

NEW YORK, Nov. 18.—Liquidity of securities on the stock exchange made perceptible progress Thursday, the reaction being again accompanied by unsettlement in various branches of commerce and industry and additional confusion in the leading commodity markets.

Thursdays losses were sustained in the face of the easiest money conditions known for many weeks. All discount rates were reduced, and interest rates on a per cent during the middle season, while time funds were more freely offered than at any time since the early autumn.

One of the significant developments was the fall of the price of shares of American International corporation. That stock suffered an extreme loss of eleven points.

Suspension of the American International dividend was the signal for a general selling of other holdings.

Marine preferred making a net loss of 5.34 points. United Fruit 8.38 and Atlantic Gulf 2.24.

United States Steel made a new record through its fall of 3.21 and lost one point on the day.

Among the other outstanding features of weakness were the steels, equipments, motor specialties and tobacco and leather issues at great recessions of 1 to 6 points.

Both the New York Stock Exchange and International was attended by variable but moderate declines.
